

Information Security Consulting Services

The demand on increased network, application, people and process security is an emerging need for every organization. Leading organizations that want to enhance their internal operations to ensure a high level of information assurance realize and deem a lower IT operational risks. VERSOS Information Security Consulting Services (ISCS) offer a comprehensive suite of services to identify risks, mitigate and enhance IT controls. The result is a balanced secure operational environment.

Organizations continuously :

- How secure is my company's network and IT resources ?
- Are my applications free of vulnerabilities ?
- Do I have the time and budget to invest in IT security ?
- How effective is my organization's disaster recovery plan ?
- Are the current physical and environmental controls in place and sufficient ?

VERSOS is a vendor-neutral information security consulting company based in the Kingdom of Saudi Arabia. With the help of VERSOS ISCS these and more demanding questions can be evaluated and answered. VERSOS provides solid and factual based answers to more demanding and challenging questions. Collectively, our knowledgeable and experienced consultants, our tested and proven methodology, our engineering approach to secure IT challenges and our use of custom tools add intangible value to all our clients and in all deployed solutions.

VERSOS ISCS ensure that your organization level of information security is up to international standards and best practices thus answering the big question "Is my organization secure ?"
